Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Recommend ethical methods of implementing and employing Artificial Intelligence (AI) in cloud, business, and cybersecurity environments.
- Utilize AI-driven tools and industry-standard methods to generate actionable information from large data sets.
- Properly apply statistical analysis to guide Machine Learning (ML).
- Plan effective applications of AI to real business problems.
- Plan effective applications of AI to real cybersecurity problems.
- Integrate AI tools and concepts with cloud computing domains.
