

BIOLOGY - NATURAL RESOURCES

Explore More About This Program: <https://cwi.edu/program/biology>

Program Description

The Biology - Natural Resources Associate of Science degree is designed for students transferring to a four-year college or university, such as the University of Idaho - College of Natural Resources. It is appropriate for students with interests in the following fields: botany, conservation biology/ecology, conservation social sciences, ecology, environmental science, fish and wildlife management/science, forestry management/science, public/environmental health, rangeland management/science, and renewable materials. This program of study allows students to develop a strong foundation in the biological sciences and is an entry point for a wide variety of natural resource-related careers. The program emphasizes active, collaborative, and experiential, learning environments and provides students with the opportunity to develop and refine the science-process-skills they will use as professionals. The Biology - Natural Resources Associate of Science degree has articulation agreements ("2+2s") with partnering institutions in Idaho assuring students their work at CWI will be productive and honored. Students are encouraged to contact their advisors and their future transfer institution (if known) for additional information regarding the appropriateness of this major for their academic path.
