

# CHEMISTRY

Explore More About This Program: <https://cwi.edu/program/chemistry>

## Program Description

The study of chemistry is particularly interested in finding connections between the properties of matter and the structure of the particles that compose it. It requires curiosity, imagination, calculation, and commitment.

Students majoring in Chemistry at CWI can obtain an associate of science degree and transfer to a four-year institution to obtain a bachelor's or other advanced degree. Understanding and applying the concepts learned in chemistry will prove useful in many fields. Majors in chemistry may pursue careers in medicine, engineering, environmental science, and forensic science, as well as more traditional fields including biochemistry, organic, analytical, inorganic, or physical chemistry.

## Degrees and Certificates

- [Chemistry - Associate of Science Degree \(AS\)](#)

## Related Degrees and Certificates

- [Biotechnology Laboratory Assistant - Academic Certificate \(AC\)](#)
