Program Description

The Philosophy program at CWI aspires to invigorate and prepare every student to think critically, utilize logic, and communicate effectively. Philosophy is an invigorating study that prepares students for an appreciation of the value of the philosophical life; a life focused on the love and pursuit of wisdom by examining the rich philosophical content of the Eastern and Western intellectual traditions. Students cultivate within themselves and others the habits of critical thinking and reflection on concrete problems and issues in a fully human life.

This program will produce graduates who are prepared for transfer to a four-year institution to obtain a bachelor's degree in final preparation for the broad range of professional and graduate possibilities available to students who rank nationally in GRE, LSAT, and MCAT test scores.
